

Lab 1-----3D mesh model operation

Alexandre, Please notice that:

Experimental purpose and basic requirements:

- (1) Master the reading of Obj files; (We provide a dragon.obj for you)
- (2) using a given data structure class to establish a data structure for reading in the mesh model;
- (3) drawing the 3D model using the OpenGL class library;
- (4) Using the OpenGL class library to increase the operation of rotating, scaling, and panning the 3D model by mouse interaction;
- (5) use the OpenGL class library, add lighting, rendering effects
- (6) Use the OpenGL class library to set the material to achieve translucent effect.

Alexandre should submit a ".zip" or ".rar" compressed file package named as "Lab01_Alexandre.zip" or "Lab01_Alexandre.rar" containing:

(1) a lab report named as "**Lab01_Alexandre.pdf**" or "**Lab01_Alexandre.doc**" that describes how you designed the program, what features your program implements, and gives screenshots.

(2) source code named as "**Lab01_Alexandre.cpp**"

Please submit it to cg2019fall@163.com before **10am, 10 October 2019**

实验 1———三维网格模型操作

实验目的与基本要求:

- (1) 掌握 Obj 文件的读入; (读入提供的 dragon. obj 文件)
- (2) 利用给定的数据结构类, 建立读入网格模型数据结构;
- (3) 利用 OpenGL 类库, 对三维模型进行绘制;
- (4) 利用 OpenGL 类库, 增加采用鼠标交互方式对三维模型进行旋转、放缩、平移等操作;
- (5) 利用 OpenGL 类库, 添加光照, 渲染效果
- (6) 利用 OpenGL 类库, 进行材质设定, 实现半透明效果。

提交要求:

请提交一个压缩文件 "Lab01_Name.zip" 或 "Lab01_Name.rar", 例如 "Lab01_李庭瑶.zip" 包括:

1. 一份**实验报告**, 描述你如何设计本程序, 你的程序实现了哪些功能, 并且给出屏幕截图。命名为 "Lab01_Name.doc" 或 "Lab01_Name.pdf", 例如 "Lab01_LiTingyao.pdf"。
2. **源码**, 命名为 "Lab01_Name.cpp", 例如 "Lab01_LiTingyao.cpp"。

请于2019年10月10日早10点前提交至cg2019fall@163.com, 邮件主题与文件名相同。
